

# Product data sheet Lucogrid® Bitumen

## Lucogrid® Bitumen

Pre-bituminised asphalt reinforcement - can be applied locally or to the entire surface

## Fields of application

- Durable mending of existing roads (to avoid and to adjust cracks due to high strain, temperature differences and so on)
- Assembly into new roads for a durable mending of cracks

#### **Attributes**

Lucogrid® Bitumen adheres because of the pre-bitumination perfectly to the already assigned emulsion. On Lucogrid® Bitumen's top side are gritted grids to ensure an immediate trafficability for the construction traffic.

#### **Processing**

- Milling of the asphalt
- Proper cleaning of the milling surface
- Application of the bituminous emulsion
- mechanical installation of Lucogrid® Bitumen

#### or

- manuel installation of Lucogrid® Bitumen
- Application of the top asphalt layer (thickness of 3,5 cm at least)

### Delivery form

Lucogrid® Bitumen is available with widths of 0,97 m, 1,50 m und 1,95 m as standard (further width on request). The length of roll is 50 m.

The rolls are wrapped separately.

main direction MD	cross direction CD
Lucogrid® Bitumen	
≥ 73.000	≥ 240.000
≤ 4,5	1,75
46 (50 fibre strands)	46 (52 fibre strands)
120 (at 2,60 % elongation)	200 (at1,75 % elangation)
0,97/1,50/1,95 (further widths on request)	
50	
250 - 300 g/m² bituminous emulsion dependin on type and substrate
